REPORT ON THE PROGRESS OF THE WORK

The work has been carried out in accordance with the programme of work approved by the Council at its meeting on 15th June 1960. The main areas of activity have been the study of the structure and properties of the various forms of the polymer, and the investigation of the mechanism of the reaction between the polymer and the various reagents used.

The results of the work carried out during the period from 1st July to 31st December 1960 are reported in the following sections. The first section deals with the study of the structure and properties of the various forms of the polymer, and the second section deals with the investigation of the mechanism of the reaction between the polymer and the various reagents used.
